

VINAYAK KATTIMANI

Data Analyst

Bangalore, India | +91 72599 33245 | vinayarunkattimani@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Data Analyst with hands-on experience turning large, messy datasets into decisions using SQL, Power BI, Tableau, Excel, Python, and AWS. Analyzed 1M+ financial transactions to uncover \$1.2M in revenue leakage, built credit-risk models achieving 85% recall on loan defaulters, and improved last-mile delivery efficiency by 15-20% through route analysis. Skilled at data cleaning, dashboarding, and translating findings into recommendations that non-technical stakeholders can act on. Seeking a Data Analyst, Business Analyst, or Risk Analyst role.

TECHNICAL SKILLS

- **Languages:** Python, SQL (PostgreSQL, SQL Server), Java
- **Analytics & BI Tools:** Power BI, Power Query, DAX, Tableau, Google Analytics
- **Data Handling & Reporting:** Advanced Excel (Pivot Tables, VBA, Macros), ETL, Data Cleaning, Data Modeling
- **Statistics & Modeling:** Logistic Regression, ROC-AUC, Confusion Matrix, Root Cause Analysis, A/B Testing fundamentals
- **Other Tools & Methods:** REST APIs, JIRA, Git/GitHub, Agile/Scrum, Insight Communication, Performance Marketing
- **GenAI:** Prompt Engineering, LLM-assisted Data Analysis, ChatGPT/Claude for EDA & Reporting, AI-assisted SQL & Python Development

EXPERIENCE

Software Development Intern — Kodnest Technologies

Mar 2025 – Aug 2025

Excel, SQL, Power BI · Business Intelligence · Career Analytics · Bangalore, India

- Cleaned and analyzed large-scale survey data (1,000+ responses) to surface career preferences, hybrid-work expectations, and key motivational drivers among job seekers.
- Designed and published interactive Power BI dashboards tracking career drivers and workforce trends, used directly by leadership to shape talent strategy.
- Translated survey findings into actionable recommendations that informed employer engagement strategy, strengthening KultureHire's talent insights offering.

PROJECTS

Transaction Failure Analysis Using SQL | [GitHub](#)

SQL, Power BI, Excel · Financial Analysis · Risk Management

- Analyzed 1M+ digital payment transactions in SQL to identify failure patterns by bank and merchant.
- Isolated session-expiry and API-mismatch errors as the root cause of 15%+ of failures, quantifying \$1.2M in associated revenue leakage.
- Built a Power BI dashboard surfacing the top 5 high-risk merchants responsible for 18% of failures, enabling targeted remediation.

LoanTap Personal Loan Underwriting — Case Study | [GitHub](#)

Python, SQL, Power BI, Excel · Credit Risk · Logistic Regression

- Cleaned and engineered features from 30K+ loan-applicant records, including credit history and loan terms, for a default-prediction model.
- Built and tuned a logistic regression model to predict borrower default, optimizing thresholds to minimize false positives.
- Engineered risk indicators (debt-to-income ratio, credit utilization, payment-to-income ratio) that improved model accuracy.
- Achieved 85% recall on true defaulters, validated with ROC-AUC and confusion-matrix analysis.
- Delivered Power BI dashboards visualizing applicant risk tiers to support data-driven underwriting decisions.

Last-Mile Delivery Analysis | [GitHub](#)

SQL, Power BI, Excel · Supply Chain Analysis · Operations

- Processed and cleaned 100K+ delivery records to evaluate on-time performance, vehicle load, and route delays.
- Pinpointed high-delay routes responsible for 66% of late deliveries and recommended route-level fixes.
- Delivered insights that cut delivery time by 15-20% and improved vehicle utilization.

EDUCATION

Bachelor of Engineering (B.E.) in Artificial Intelligence and Machine Learning

Dec 2022 – Jul 2025

Global Academy of Technology — Bangalore, Karnataka | CGPA: 7.9
