

SUMMARY

Detail-oriented QA Engineer with a B.E. in AI & ML and hands-on testing internship experience in Manual, API, and Automation Testing. Skilled in Java, Selenium WebDriver, REST Assured, Postman, SQL, Jenkins, Git, and Maven, with practical experience building POM-based automation frameworks and testing REST APIs.

EDUCATION

Global Academy of Technology	Dec 2022 – Jul 2025
Bachelor of Engineering (B.E.) in Artificial Intelligence and Machine Learning	Bangalore, India

TECHNICAL SKILLS

Programming & Web Technologies: Java, HTML, CSS, JS, SQL (joins, CTEs, window functions), Python
Automation & API Testing Tools: Selenium WebDriver, TestNG, REST Assured, Postman, Maven, Jenkins
Tools & Platforms: Git, GitHub, Linux, JIRA
Methodologies & Testing Skills: Manual Testing, Automation Testing, API Testing, Functional Testing, Regression Testing, Smoke Testing, Test Case Design, SDLC, STLC, Agile, Scrum

EXPERIENCE

Software Testing Intern — KodNest	Dec 2025 – Present
Java · Selenium WebDriver · SQL · Jenkins · Postman · REST Assured · Git · TestNG	Bangalore, India

- Automated 30+ test cases using Selenium WebDriver, Java, TestNG, and Maven, reducing manual testing effort by approximately 50%.
- Developed and maintained a Page Object Model (POM) framework with reusable components, improving script maintainability and scalability.
- Executed daily smoke, regression, and functional test suites across multiple browser configurations and identified critical defects.
- Generated Extent Reports and analyzed test execution results to identify failures and improve test coverage.

PROJECTS

Automation Testing Framework for OrangeHRM Application | [GitHub](#)
Selenium, Java, TestNG, Jenkins, CI/CD, POI, Extent Report, Maven

- Automated 52 end-to-end test scenarios covering Employee and User Management modules using Selenium WebDriver and TestNG.
- Automated key modules like Employee Management and User Management including form handling, drop-downs, and dynamic elements.
- Achieved 90% automation coverage for critical workflows by implementing a Page Object Model (POM) framework.
- Integrated the framework with Jenkins for continuous execution, generating HTML/Extent reports and identifying 6 UI-related defects across the 52 automated test scenarios.

E-Commerce API Testing Framework | [GitHub](#)

Postman, REST Assured, TestNG

- Manually tested 18 REST API requests covering Authentication, Product, Cart, and Order Management modules using Postman, validating status codes, response bodies, and headers.
- Currently automating these API test scenarios using REST Assured and TestNG, with CI/CD integration via Jenkins planned.

CERTIFICATIONS

- Selenium WebDriver with Java — Udemy
- Manual Testing Fundamentals — Udemy
