

SUMMARY

Enthusiastic and detail-oriented aspiring QA Engineer with knowledge of Manual Testing, API Testing, and Automation Testing. Skilled in Java, Selenium WebDriver, TestNG, Postman, REST API, SOAP API, PostgreSQL, Git, GitHub, and Jenkins. Interested in building reliable and scalable software through effective testing practices. Currently improving skills in automation frameworks, API testing, and real-world QA processes.

TECHNICAL SKILLS

Automation & CI/CD: Java, Selenium WebDriver, Selenium Automation, TestNG, Jenkins, Git, GitHub, Linux, HTML, CSS, JS

Testing: Automation Testing, Manual Testing, Functional Testing, Regression Testing, Smoke Testing, Test Case Design, Defect Lifecycle, JIRA, SQL, Backend Testing, API Testing, Postman, REST API

Methodologies: SDLC, STLC, Agile, Scrum, AI-assisted development tools: ChatGPT, Copilot, Claude

EDUCATION

Global Academy of Technology, Bangalore

Bachelor of Engineering (B.E.) in Artificial Intelligence and Machine Learning

Dec 2022 – Jul 2025

EXPERIENCE

Software Testing Intern — KodNest

Dec 2025 – May 2026

Java · Selenium · SQL · Jenkins · Postman · RestAssured · HTML CSS JS

Bangalore, India

- Automated 80+ test cases using Selenium WebDriver, Java, TestNG, and Maven, reducing manual testing effort by approximately 60%.
- Developed and maintained a Page Object Model (POM) framework with reusable components, improving script maintainability and scalability.
- Executed daily smoke, regression, and functional test suites across multiple browser configurations and identified critical defects.
- Integrated reporting using Extent Reports and generated detailed execution summaries for stakeholders.

PROJECTS

Automation Testing Framework for OrangeHRM Application — [GitHub](#)

Selenium, Java, TestNG, Jenkins, CI/CD, POI, Extent Report

- Developed a Selenium WebDriver automation framework using Page Object Model (POM) for OrangeHRM application.
- Automated key modules like Employee Management and User Management including form handling, drop-downs, and dynamic elements.
- Implemented Fluent Wait and Explicit Wait to handle synchronization issues and improve test stability.
- Integrated the framework with Jenkins for continuous execution and generated HTML/Extent reports for test results.

E-Banking Web Application Automation — [GitHub](#)

Selenium, Java, TestNG, Jenkins, CI/CD

- Automated functional, regression, and smoke test cases for authentication, fund transfers, and account validation flows. Implemented Page Object Model to improve test automation maintainability and scalability.
- Integrated automation framework with Jenkins CI/CD pipeline to trigger automated test execution and generate test reports during build execution.

CERTIFICATIONS

- Selenium 4 WebDriver with Java and Manual Software Testing Fundamental — KODNEST
