

Vinayak Kattimani

Data Analyst

Bangalore, India | 7259933245 | vinayarunkattimani@gmail.com | [linkedin](#) | [github](#)

SUMMARY

Data Analyst skilled in SQL, Power BI, Tableau, Excel, Python and AWS with experience in financial analytics, risk-management and supply-chain analysis. Proven ability to analyze 1M+ transactions, uncover \$1.2M revenue leakage, and deliver insights that improved delivery efficiency by 15–20%. Seeking data, business, or risk analyst roles to drive actionable insights and business growth.

TECHNICAL SKILLS

Languages: Python, SQL (PostgreSQL, SQL Server), Java

Analytics & BI Tools: Power BI, Power Query, DAX, Tableau

Data Handling & Reporting: Advanced Excel, Pivot Tables, ETL, Data Cleaning, Data Modeling, VBA, Macros

Other Tools: REST API, Google Analytics, JIRA

Methodologies: Agile, Scrum, Root Cause Analysis, Insight Communication, Performance Marketing

EXPERIENCE

Business Analyst Intern | KultureHire

Mar 2025 – Aug 2025

Excel, SQL, Power BI · Business Intelligence · Career Analytics

Bangalore, India

- Cleaned and analyzed large-scale survey data to uncover career preferences, hybrid work expectations, and motivational factors.
- Built Power BI dashboards highlighting career drivers, hybrid work expectations, and motivational factors.
- Delivered recommendations to improve employer engagement strategies, strengthening KultureHire's talent insights.

PROJECTS

LoanTap Personal Loan Underwriting-Case Study | [GitHub](#)

(Python, SQL, Power BI, Excel · Credit Risk · Logistic Regression)

- Performed data cleaning and feature engineering on 30K+ loan-applicant records (credit history, loan terms).
- Built and tuned a logistic regression model to predict borrower default, optimizing for minimal false positives.
- Engineered key risk indicators—debt-to-income ratio, credit utilization, and payment-to-income ratio—to improve model accuracy.
- Evaluated performance with ROC-AUC and confusion-matrix metrics, achieving 85 % recall for true defaulters.
- Created Power BI dashboards to visualize applicant risk tiers and recommend data-driven underwriting decisions.

Transaction Failure Analysis Using SQL | [GitHub](#)

(SQL, Power BI, Excel · Financial Analysis · Risk Management)

- Analyzed 1M+ digital payment transactions to uncover failure patterns by bank and merchant.
- Identified 15%+ failures tied to session expiry and API mismatches, quantifying \$1.2M loss.
- Built Power BI dashboards highlighting top 5 high-risk merchants driving 18% of failures.

Last-Mile Delivery Analysis | [GitHub](#)

(SQL, Power BI, Excel · Financial Analysis · Supply Chain Analysis)

- Processed and cleaned 100k+ delivery records to evaluate on-time performance, vehicle load, and route delays.
- Pinpointed high-delay routes causing 66% of late deliveries and recommended fixes.
- Delivered insights that cut delivery time by 15–20% and improved vehicle utilization.

EDUCATION

Global Academy Of Technology

Bangalore, Karnataka

Bachelor of Engineering (B.E.) in Artificial Intelligence and Machine Learning

Dec 2022 – Jul 2025

CGPA: 7.9
